

Medical Director #2018-17 (BHHC) The purpose of this position is to provide leadership, guidance, and medical services to the Sac and Fox Health Program staff. It consists of directing patient care, health services evaluation programs, and interacting with the Nation's staff, agencies and committees. This position assists the entire Nation with internal/external issues so as to position, structure, and guide the Nation in the health care arena. Additional activities are conducted with the objective of maximizing the efficiency and effectiveness of the delivery of health services. This position is responsible for the overall clinical management of the health program working with the various clinical program managers on day to day operational issues. Clinical management of the health program encompasses the provision of medical care/service of the patients that address their physical, social, cultural and mental wellbeing. This in itself is of a complex nature and requires the Medical Director to practice holistic medicine with respect to the individual Native American. The incumbent must use ingenuity in resolving problems as they occur in the delivery of services and make recommendations on policy and procedural matters. The incumbent must maintain effective work relationships with employees, supervisors, tribal officials and other agencies that come in contact with the health program. The Medical Director is responsible for providing the appropriate administrative oversight of the clinical operations of the health program. This will require the Medical Director to schedule their activities to ensure that adequate time is spent on required administrative activities. Accomplishment of these administrative duties may involve extensive review of internal/external medical records, review of current medical literature, library research and may require the incumbent to spend time away from the health center. Incumbent must be a graduate of an accredited college or university of medicine and possess a current unrestricted Oklahoma license, current DEA license, and an eligible Medicare/Medicaid provider. Must also be board certified.
